WHY #GODUCTLESS?

Discover the ductless heat pump:
A better way to heat and cool your home

Too many households are stuck using old methods of temperature regulation that are a drain on the planet and your wallet. It's time to discover a new heating and cooling system that's better for your comfort, your budget, and the environment. Switching to Green Energy is easy with Island Ductless Heat Pumps.

IMPROVED AIR QUALITY

Whether it's wildfire smoke or seasonal allergies, you deserve to breathe fresh, clean air inside your home. All ductless heat pumps come equipped with an easy-to-clean and endlessly reusable air filtration system and the option to add additional air purification devices to remove even more contaminants from your indoor air.

CLEAN AND RELIABLE HEATING

Tackle the summer heat and winter chill with a single, multi-purpose system that runs entirely on electricity. Ductless systems eliminate the health risks that come from systems that rely on fossil fuels, like natural gas. And the best part? Keeping your space at a constant temperature is more efficient so you can enjoy consistent comfort all day and night, no matter the season!

SMART CONTROLS

Customize your system with up to eight separate temperature-controlled zones, all managed with user-friendly remote controls.

EFFICIENT, ECO-FRIENDLY, AND EASY ON YOUR WALLET

Ductless heat pumps have close to zero energy loss. Instead of generating heat, they move available heat energy from one place to another, solely run on electricity. This drastically reduces the energy and cost to climate control your home, saving you 40-60% on heating bills and eliminating reliance on natural gas and other fossil fuels, making the Green Energy switch a breeze.

EXCEPTIONALLY QUIET

Your home deserves to be free of air pollution and noise pollution too! Unlike traditional forced air heating, ductless heat pumps are whisper-quiet, so feel confident adding them to your bedroom, nursery, or home office without any fear of disruption.

DISCOVER THE ISLAND DUCTLESS DIFFERENCE

With Island Ductless Heat Pumps, #GoingDuctless has never been easier. We are committed to healthier homes and happier communities – all while providing unbeatable products, services, and prices. Together, we can help save the planet one ductless heat pump at a time!
